FUCARE Officially Joining the CNEA

On Nov 30, FUCARE was officially approved as the member of CNEA (China Nuclear Energy Association) at CNEA's council meeting.

CNEA, as a national non-profit non-governmental organization, was established on April 18, 2007. Its objective is to contribute as a bridge for CNEA's members to link with the government and foreign counterparts. The CNEA's missions are to implement thoroughly the national policies on nuclear energy development, promote industrial independent innovations and technical advance, and provide support for improving safety, reliability and economics of nuclear energy utilization.

The new membership at CNEA will provide FUCARE with advantages in keeping firm relationship with the key players, including policy makers, designing companies and users, aiming to come up with continuously developing fit safety solutions.

FUCARE specializes in developing and manufacturing high-performance blast safety solutions for industries, including Nuclear, OGP, Defense, etc.

FUCARE will attend the 2nd World Nuclear Exhibition in June of 2016 in Paris and launch a new generation of blast safety products.
